

Renewable electricity beyond 2020: Finding the right policy package

Informal brainstorming between experts and stakeholders
12 October 2012, 9:30-11:30

Venue: CEPS
Place du Congrès 1 – 1000 Brussels; Phone +32 2 229 3911

Agenda

With the discussions on the post-2020 options for renewables gathering pace, CEPS will hold an informal brainstorming to reflect upon the pros and cons of possible future options for the EU's renewable electricity policy, notably how an EU policy package could look like. The meeting will be held back-to-back with the official 'beyond2020 Mid-Term Conference' to allow some of the speakers from this event to join the brainstorming session. Beyond2020 is supported by the Intelligent Energy Europe Programme. The meeting will be held under Chatham House rules.

09:00 *Registration*

09:30 **Welcome and introduction**

Christian Egenhofer, Associate Senior Research Fellow, CEPS

09:35 **Options and policy packages for renewable electricity in the EU beyond 2020**

Christian Panzer, Energy Economics Group, Vienna University of Technology:
Harmonisation strategies for renewables beyond 2020
