

# THE GOVERNANCE OF CLIMATE RELATIONS BETWEEN EUROPE AND ASIA

## Evidence from China and Vietnam as Key Emerging Economies

Edited by **Hans Bruyninckx**, University of Leuven, Belgium, **Qi Ye**, Tsinghua University, China, **Nguyen Quang Thuan**, Vietnamese Academy of Social Sciences, Vietnam and **David Belis**, Taishindo Services, Belgium

*'This book is very timely. . . it provides important insights for bilateral cooperation and international negotiations. These lessons go beyond EU-China and EU-Vietnam relations. Many of them are applicable to other countries in Asia, a region which will remain a key priority for EU foreign and climate policy, not least as the EU's largest trading partner.'*

– From the foreword by Jos Delbeke, Director General, EC DG Climate Action

*The Governance of Climate Relations between Europe and Asia* offers a thorough empirical study of the most fundamental dynamics involved in EU climate relations with China and Vietnam in the context of global climate governance.

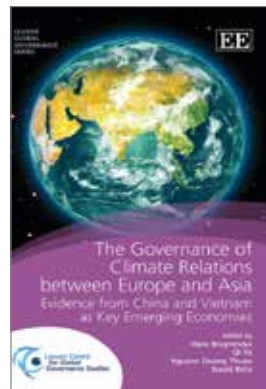

This book presents a study of the most important governance processes in current EU-Asia climate relations. It focuses on in-depth empirical case studies, offering a comprehensive relational perspective. Contributions on China cover the most essential issues, interests and actors, while the inquiry of EU-Vietnam relations mainly focuses on the Clean Development Mechanism as the main channel of bilateral climate action.

This landmark study will appeal to both policymakers and practitioners faced with the extraordinary task of managing the increasingly complex and multilevel interactions of current EU-Asia climate relations as well as global carbon market watchers and professionals dealing with emissions trading in the European Union, China and Vietnam. It will also be of interest to scholars and postgraduate students of international relations, Chinese and EU foreign policy, global environmental and climate governance and international law.
