

NETGREEN Thematic Policy Workshop

“Maximizing resource efficiency throughout the EU economy”

Brussels, 11 March 2015

Venue: CEPS, Place du Congrès 1, 1000 Brussels

NETGREEN, short for “Network for Green Economy Indicators”, is an EU-funded project designed to facilitate the adoption of policies that will advance progress towards a green economy. The key output of the project is an open access, interactive website providing information on indicators that can be used to measure progress towards a green economy

Resource efficiency has been identified by the EU Commission (2011) as one of the seven flagship initiatives that are part of the “EU 2020 strategy aiming to deliver smart, sustainable and inclusive growth”. This thematic NETGREEN workshop will focus on how Europe can boost resource efficiency through the use of effective policy instruments and appropriate indicators. The workshop will cover issues such as which are the major drivers and barriers to resource efficiency and what is the role of indicators in measuring progress towards more efficient use of material resources. The discussion will start with a presentation of NETGREEN, demonstrating how it supports policy makers and other stakeholders in measuring progress towards resource efficiency. The event will feature a panel composed of experts from policy, research, academia business and NGOs.

AGENDA

- 10:00 - 10:30 Arrival & registration of participants
- 10:30 - 10:35 Welcome by **Arno Behrens**, Head of Energy and Research Fellow, Centre for European Policy Studies (CEPS)
