

‘OPEN MIRROR GROUP’ WORKSHOP

Cumulative Costs Assessment (CCA) of the EU Ceramics and Glass industries

Event Date: Tuesday 26th April 2016 – 10:30 -14:00

Venue: CEPS Conference Room, 1, Place du Congrès 1000 Brussels.

Participation via web-conference is possible upon request.

CEPS, in partnership with Economisti Associati and Ecorys Brussels, is carrying out the “Cumulative Cost Assessment (CCA) of the EU ceramics and glass industries” for the European Commission (DG GROW). This study aims to identify, assess and quantify the regulatory costs imposed by selected areas of EU legislation (e.g. energy, environment, climate, internal market, competition, trade) on ceramics and glass companies over the period 2005-2014. In addition, the research team will evaluate the impact of such regulatory costs on the cost structure and profitability of companies operating in the industry as well as on their international competitiveness.

The purpose of the ‘Open Mirror Group’ Workshop is to discuss the rationale and scope of the Cumulative Cost Assessment, the state of play of the study and the role of stakeholders. The event will be opened by a speech from the European Commission. Furthermore, a panel composed of the main EU associations representing ceramics and glass manufacturers will discuss the relevance of the CCA for the two industries.

DRAFT AGENDA

- 10:30** **Registration**
- 11:00** **Introduction** (European Commission/DG GROW)
- 11:15** **Presentation of the CCA** (CEPS, Ecorys and Economisti Associati)
- 11:45** **Q&A**
- 12:15** **Panel with stakeholders**
- Cerase-Unie
 - EDG -European Domestic Glass
 - FEVE – The European Glass Container Association
 - Glass for Europe
- 12:45** **Q&A**
- 13:00** **Networking Lunch**
