

Stakeholder workshop Corporate sourcing of renewable energy

Tuesday, January 29th 2019: 10:00 – 12:30

CEPS, in cooperation with COWI, is conducting a study for the European Commission's DG ENER on “**Corporate Sourcing of Renewable Energy**”. The study aims to answer two key questions:

- What are the drivers of, and constraints on, the corporate sector's transition to renewable energy?
- What is the impact of renewable energy on the competitiveness of EU companies?

Deepening our knowledge of the opportunities and challenges for EU companies sourcing renewable energy or aspiring to do so will help reap the full potential of corporate sourcing of renewables and contribute to the green energy transition by allowing for more effective policy interventions at the EU and national levels.

In this context, CEPS is hosting a **stakeholder workshop** to present the **preliminary findings of the study**. These have been based on comprehensive consultation activities including interviews with key EU and national players, an online survey with corporates and case studies examining the point of view of buyers.

The event is free of charge; registration is required. Remote participation can be arranged upon request.

Agenda

10:00	Registration & coffee
10:30	Welcome address by Christian Egenhofer, Senior Research Fellow and Head of the Energy and Climate Programme, CEPS
10:40	Preliminary findings: “Corporate sourcing of Renewable Energy” by Felice Simonelli, Senior Research Fellow and Head of Policy Evaluation, CEPS
