

Kick-off workshop EU's Global Leadership in Renewables

Monday, 9 March 2020, 10:00 – 12:00

CEPS, in cooperation with COWI, Prognos and CapGemini, is launching a new study for the European Commission's DG Energy on "EU's Global Leadership in Renewables". The study aims to answer two main questions:

- What are the key countries, key markets and key activities in the global renewable energy supply chain and how are they expected to evolve over the next 10 years?
- What policies would best support the industrial competitiveness of the European renewable energy industry, and its added value to the EU economy and society?

The EU has committed to becoming a global leader in renewable energy. An ambitious and binding renewable energy target of 32% by 2030 was introduced as a cornerstone of its energy policy. While reaching the energy targets, the EU also aims at maximising the competitiveness of the European renewable industry and generating positive socio-economic impacts.

In this context, the European Commission is hosting a **kick-off meeting** at CEPS to **present this new project** and **engage EU stakeholders**.

The event is free of charge; registration is required. Remote participation can be arranged upon request.

Agenda

9:30	Registration & coffee
10:00	The policy context by Ruud Kempener, Policy Officer, DG ENER, European Commission
10:20	Q&A
10:30	Analytical framework <ul style="list-style-type: none">• Objectives and expected results Malene Sand Jespersen, Market Director, COWI• Key countries, markets and activities Jannis Lambert, Project Manager, Prognos
